Technical Data Sheet

24 V Battery Capacity Indicator

Reference | IND24V2

The battery gauge shows the remaining charge in a lithium iron phosphate battery.

Technical Specifications

Product reference: IND24V2
Dimensions: 60 × 15 × 2.5 mm
Wire length: 130 mm

Five LEDs indicate the remaining battery charge when the TEST button is pressed. The LEDs remain lit for five seconds and then switch off.

Connect the two wires to the battery.

The indicator can be mounted using double-sided adhesive tape or glued to a flat surface.
