Technical Data Sheet

Universal Battery Capacity Indicator | 12–70 V

Reference | INDOM013

Universal flush-mount voltage-based battery indicator. Configurable for 12, 24 or 48 V lead-acid, lithium-ion, LiFePO4 or NiMH battery systems.

Technical Specifications

Product reference: INDOM013
Operating voltage range: 7–70 V
Operating consumption: <15 mA
Operating temperature: -10 to +70°C
Panel cut-out: 50 × 28 mm
Dimensions: 54 (L) × 30 (W) × 28 (H) mm
Display accuracy: ±1%
3-digit display
Two-wire battery (+/–) connection
IP64: protection against water splashes

CE RoHS Compliant
